

FIG. 270.—Muscle fibers cut in cross section near vessels. There is a loss of normal markings of muscle fibers. One fiber in cross section shows an accumulation of gas and hemoglobin detritus. Occasional gas bubbles are between the fibers. There is an infected thrombus in the vessel with surrounding edema and gaseous infiltration. Accession number 2797, Army Medical Museum. Negative number 45993. Hematoxylin and eosin stain; $\times 210$
